EXECUTION

Flower AgentApp on local-agent

CARD ISSUING REGION

North America

Why this decision

"Sent to a human reviewer because of country mismatch: yes, model risk band: high, specialist stack band: high, travel check: implausible."

Written by the template fallback after the verdict. It explains; it cannot change the decision.

A person then declined it.

Who took part

the policy gate is always the final authority

COMPONENT	ROLE IN THIS DECISION	STATUS
Stripe (card checks)	Card checks returned as bands: CVC pass, funding credit	Answered
Merchant (store)	Banded its own order history locally; disclosed banded facts only	Disclosed
Bank attestation	Attested cardholder bands from its private history; answered the round-2 travel check	Answered
Coordinator (Flower AgentApp)	Ran as a Flower AgentApp on local-agent; asked the store's SuperNode over Grid and re-verified every reply	Verified
Network memory	Same card reference checked across stores; velocity low	Answered
Jev (TypeSafe)	Risk advisory vote: step up at 62% confidence; it can only add caution	Advisory

COMPONENT	ROLE IN THIS DECISION	STATUS
Policy Gate	Fixed rules held it for a person	Final authority: Human review
Human reviewer	Made the final call: declined	Final decision

Round 1 · evidence from every party

over Flower Grid

11 banded facts reached the coordinator and were verified on arrival.

Asked: Stripe (card checks), Bank attestation, Merchant (store), Network memory.

PARTY	EVIDENCE	BAND	STATUS	RISK PTS
Stripe card checks	Funding	credit	Verified	-
Stripe card checks	CVC check	pass	Verified	-
Bank attestation	Bank: behaviour	low	Verified · conflict	-
Bank attestation	Bank: recent declines	none	Verified	-
Merchant (store)	Amount	low	Verified	-
Merchant (store)	Country mismatch	yes	Verified · conflict	+2
Merchant (store)	Federated model	high	Verified	+2
Merchant (store)	New customer	no	Verified	-
Merchant (store)	Specialist models	high	Verified	+2
Merchant (store)	Velocity 24 h	low	Verified	-
Network memory	Network velocity	low	Verified	-

Round 2 · one targeted question

over Flower Grid

The bank answered one question: travel_check = implausible.

WHY IT WAS ASKED

store: the buyer is outside the card's country; bank: an ordinary cardholder, card checks pass

ANSWER

travel_check = implausible

ASKED

Bank attestation (through the store's node): travel_check only

EFFECT ON THE DECISION

Round 2: the bank finds the travel implausible, so a person must look

Policy gate · final authority

fixed rules, no model

- PASS

Evidence complete: one verified fact set for this decision
- PASS

Privacy check passed: closed vocabulary, no card-like values
- PASS

No hard stop: the CVC check did not fail
- NOTE

Risk points 6: review from 3, decline from 8
- CAUTION

Round 2: the bank finds the travel implausible, so a person must look
- CAUTION

Auto-decline line not reached: rules send it to a person
- NOTE

Model vote: step up at 62% confidence; the more cautious vote wins

Risk points by fact: Country mismatch yes (+2), Federated model high (+2), Specialist models high (+2).

Gate decision: Human review (fixed rules, then the more cautious model vote).

Human review

WHY IT WAS HELD

Round 2: the bank finds the travel implausible, so a person must look. Auto-decline line not reached: rules send it to a person

Privacy

card data never enters a model's context

0	0	12
Raw card data shared	Raw card history shared	Privacy-safe facts crossed a boundary

Only privacy-safe attestations crossed node boundaries: banded values from a closed vocabulary (629 bytes in all, 0 off-vocabulary values, 0 messages rejected at a boundary). The card goes from Stripe Elements to Stripe; the merchant holds only a Stripe payment-method id, and the bank's history never leaves the bank.

Raw card data counts card numbers the coordinator has seen, as counted by the merchant node's ledger (node-wide, not only this decision). Raw

card history counts verified values that crossed a boundary outside the closed band vocabulary. This report omits card numbers, CVC, expiry, keys, credentials, the card reference and the parties' private history.
